

Encitech Policy Statement

REACH-250 Regulations

The Registration, Evaluation, Authorisation and restriction of Chemicals (REACH) EC Regulation 1907/2006 came into force on the June 1, 2007.

All substances manufactured and/ or imported in quantities greater than 1 metric tonne per annum per legal entity, even if only supplied in mixtures or preparations, will need to be registered under REACH.

Encitech is not a prime manufacturer of chemicals, but a manufacturer/ distributor of articles covered under the legislation. At the present time we do not use any raw materials in the Candidate List of Substances of Very High Concern (SVHC) which require authorisation. In addition, we do not meet the volume criteria that would require separate registration. We shall therefore continue to pass on existing information through material safety data sheets, as required as part of REACH.

We anticipate that some of our customers will require supply chain information.

We will cooperate fully with any request with the aim to disseminate information where possible.

If you require further Information, Please contact following:
